JURIDICAL ANALYSIS: WORLD SUCCESSION DEED

A Study in International State Succession, Treaty Chains, and Global Jurisdiction.

ONE WORLD

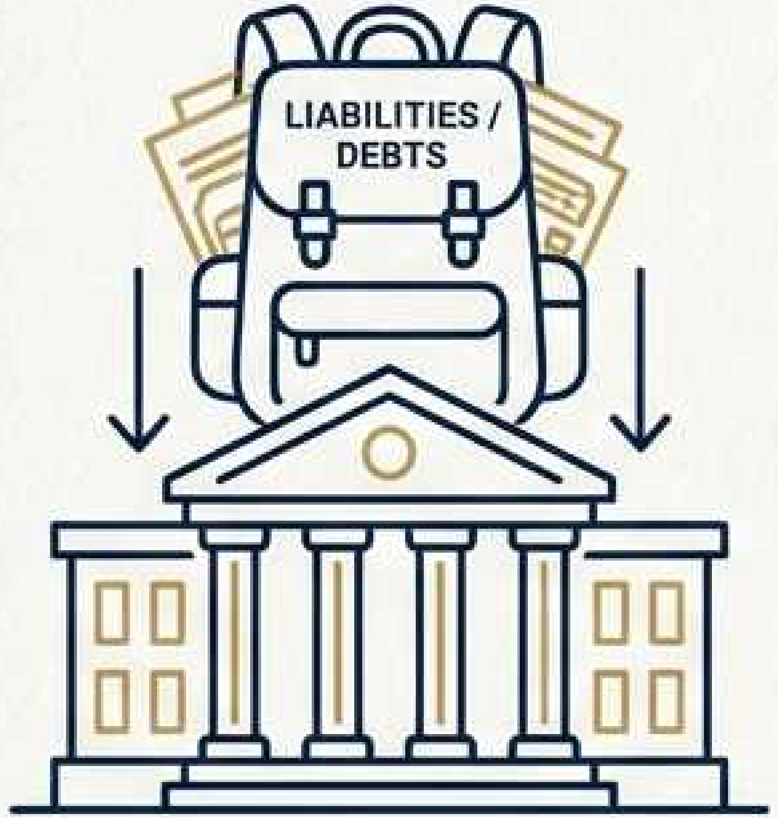
VENUE
Saarlouis / Landau in the Pfalz

LEGAL NATURE
Lex Specialis of State Succession

MECHANISM
Development as a Unit & Treaty Chains

The Legal Instrument: *Sui Generis* State Succession

UNIVERSAL SUCCESSION



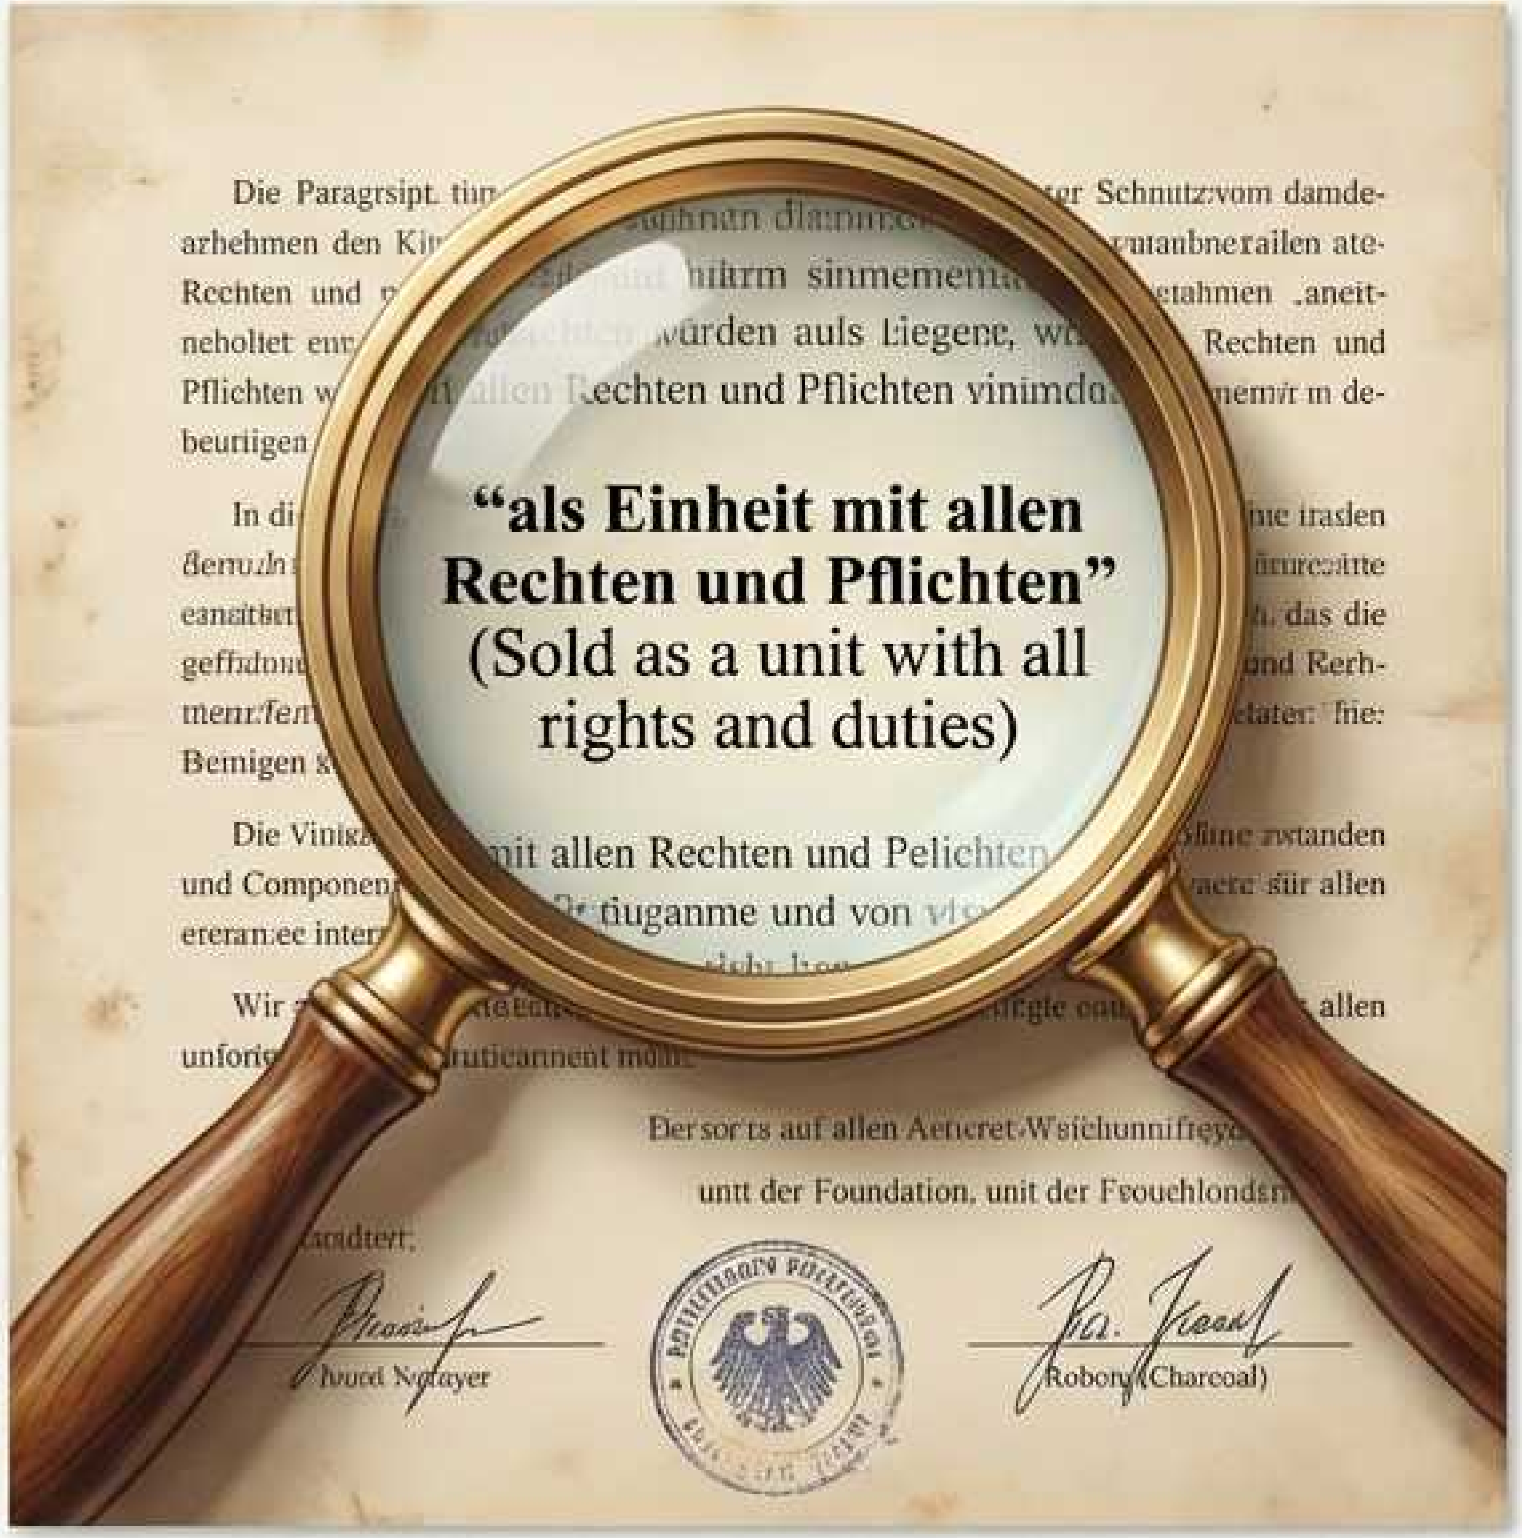
Standard International Law.
The Successor assumes all rights AND all pre-existing debts/obligations of the predecessor.

NEW FOUNDATION (PHOENIX STATE)

Deed 1400/98 Mechanism.
The Buyer initiates a *New Foundation*.

THE CLEAN SLATE PRINCIPLE (*Tabula Rasa*)**:** Defined in Art. 16, Vienna Convention (1978).
The Buyer acts as a 'newly independent state,' entering treaties with all rights but nullifying conflicting obligations through "self-contraction" (Creditor & Debtor in one person).

The Object of Purchase: ‘Development as a Unit’



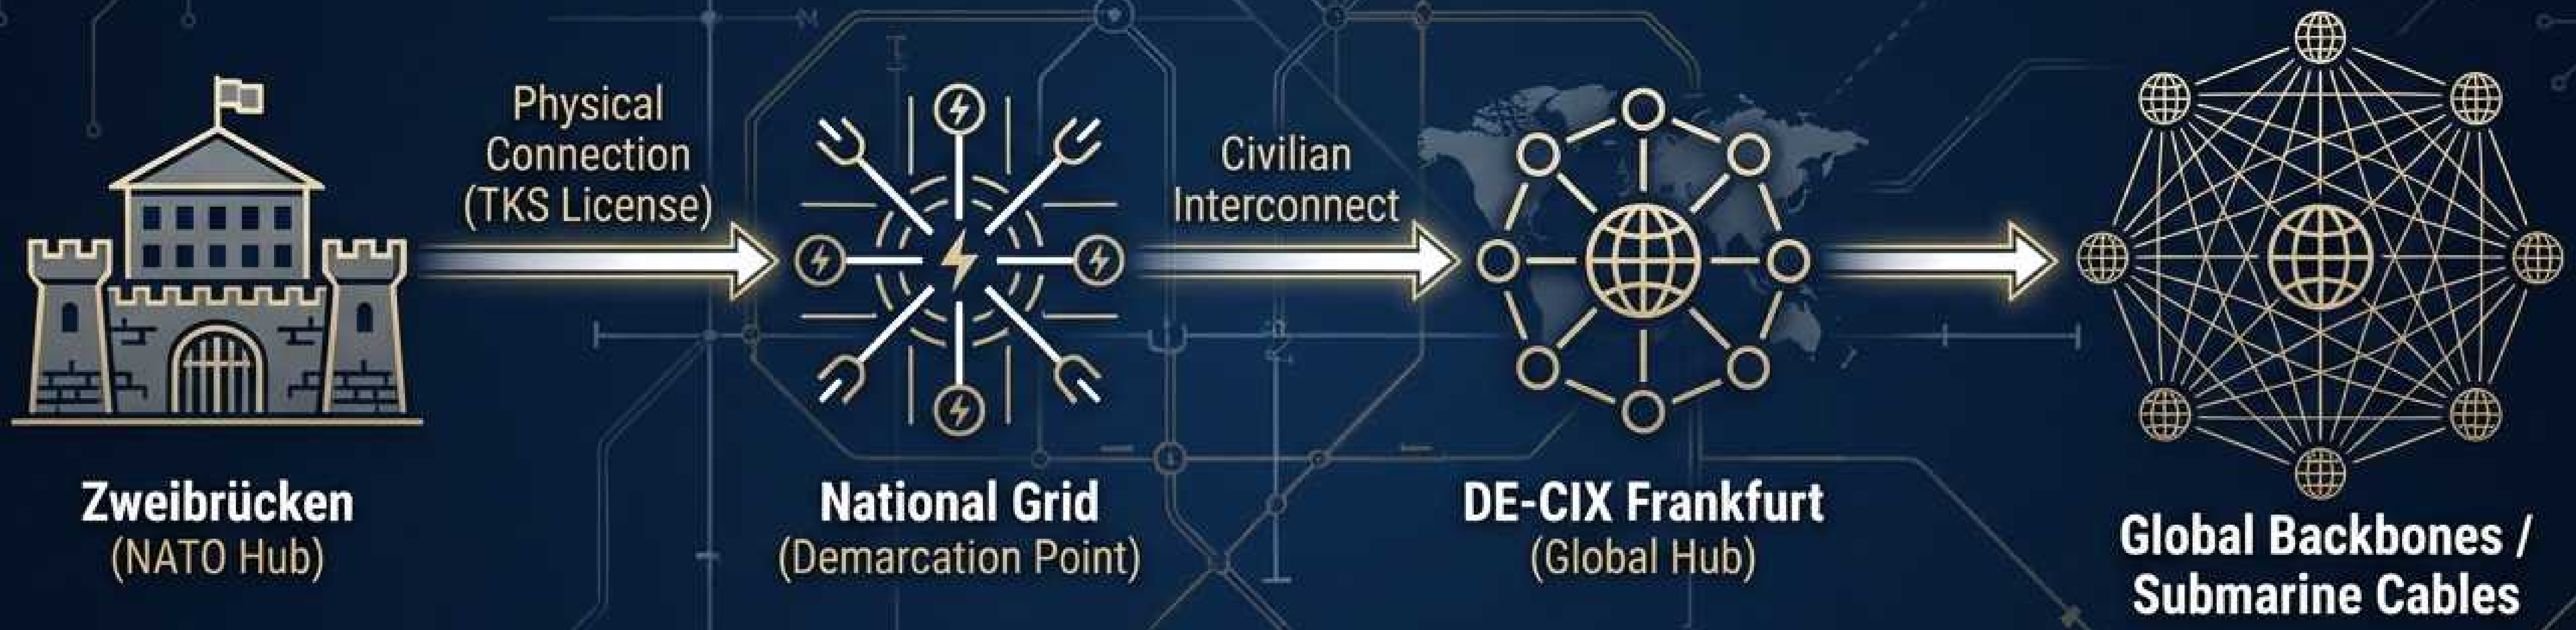
1. **The Clause:** Sold as a unit with all international legal rights, duties, and components, especially the internal and external development (§3 Abs. I).

2. **Legal Imperative:** Creates a *Universitas Rerum* (Aggregate of Things). The physical property cannot be legally separated from its serving networks.

3. **Scope of ‘Erschließung’ (Development):**
   - Telecommunications (TKS)
   - Electricity & Energy
   - Water & Heating

The Consequence: Ownership of the *connection* implies legal standing in the *network*. You cannot own the sublicense without legally affecting the whole.

The Vector: Telecommunications & The TKS Connection



THE LEGAL CONTAGION:

Level 0: Physical Barracks Cables.

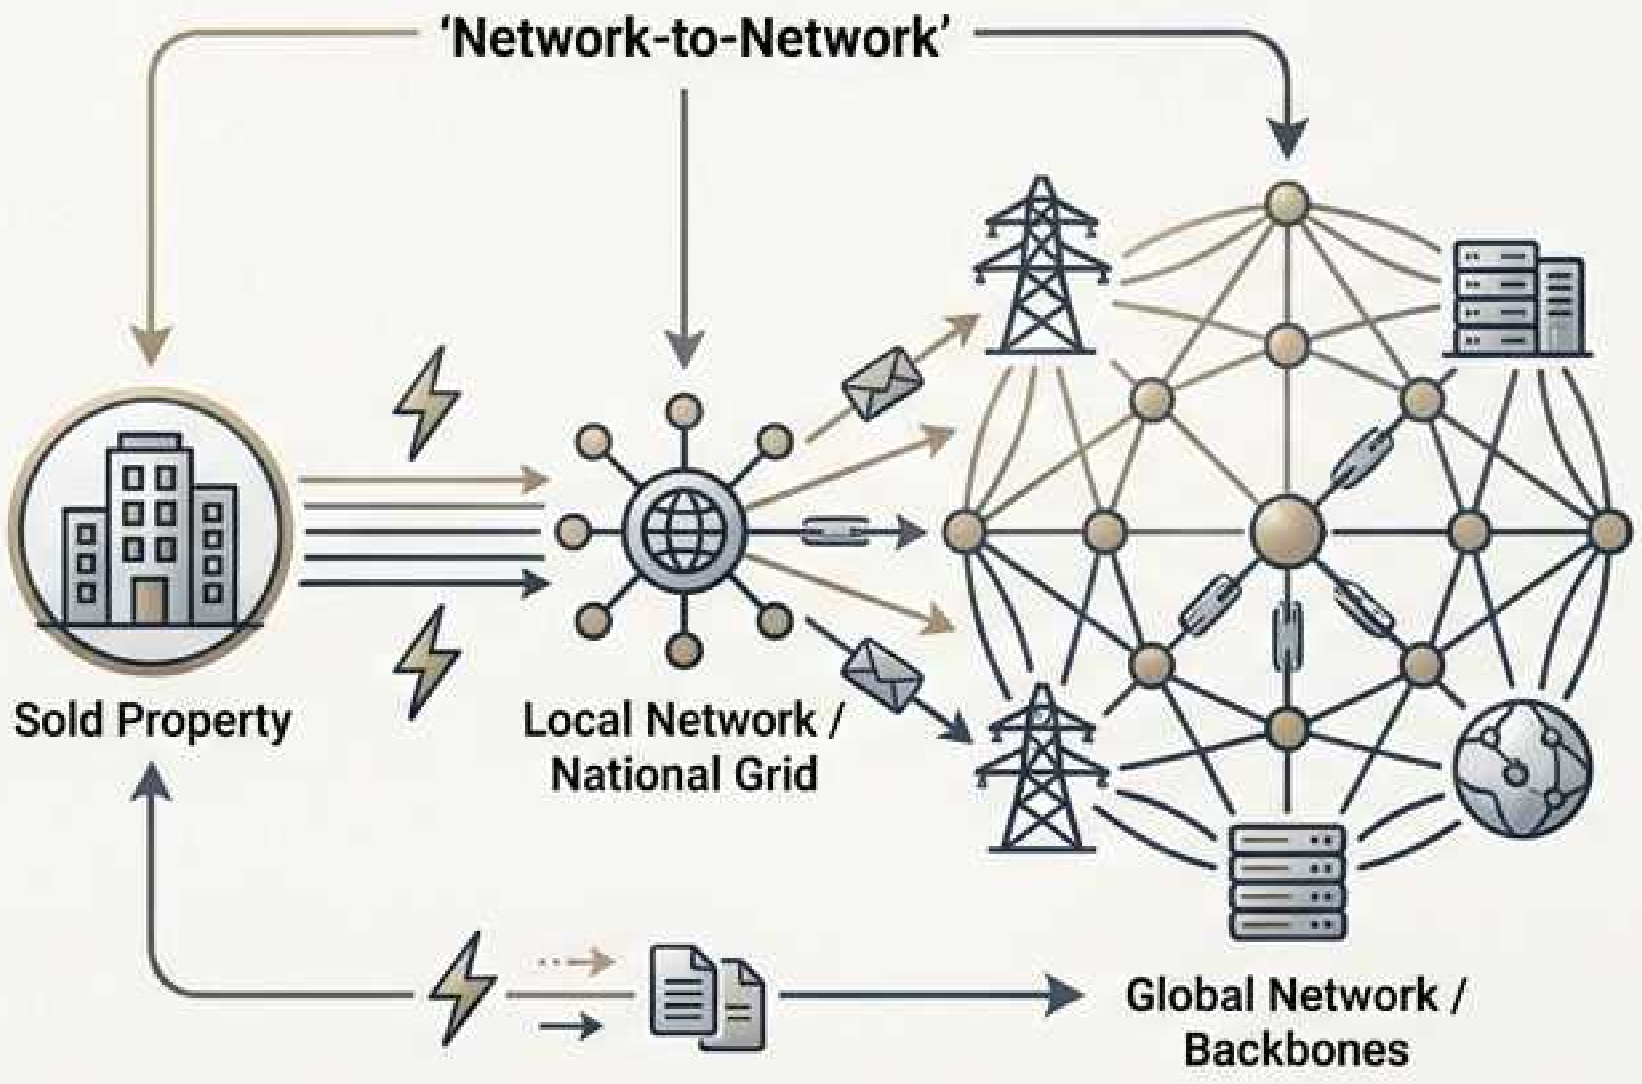
Level 1: Demarcation Point (MDF/CDC).

Level 2: National Grid & Interconnects.

Level 3: Global Backbones.

Conclusion: Acquiring the "Internal Development" grants authority over the demarcation point, and thus sovereignty over the connected network.

The Mechanism: Global Domino Effect via Infrastructure



Principle:

"Res transit cum suo onere (The thing passes with its burden/rights)."

The Mechanism:

Electricity and data do not stop at borders. The Deed sells the 'Development as a Unit.' Any network physically connected to the sold property falls under the jurisdiction of the Deed.

Territorial Regimes:

Vienna Convention (1978), Art. 11/12. Treaties establishing infrastructure usage are designed for continuity. The Buyer enters these regimes as the new Sovereign.

The 'Territory' is no longer defined by land borders, but by network topology.

The Legal Binder: Status as Supplementary Deed (*Nachtragsurkunde*)

PRE-EXISTING RELATIONSHIP

Based on the transfer relationship between FRG, Netherlands, and NATO (NATO SOFA/NTS).

The Deed is a material amendment to these ratified treaties.

AUTOMATIC RECOGNITION

International Law Principle: Only a treaty can break a treaty. A chain of treaties does not require renewed ratification for every addendum. Since “Parent Treaties” are ratified, the Supplementary Deed is automatically active for all member states.

Treaty Chain I: The NATO Integration

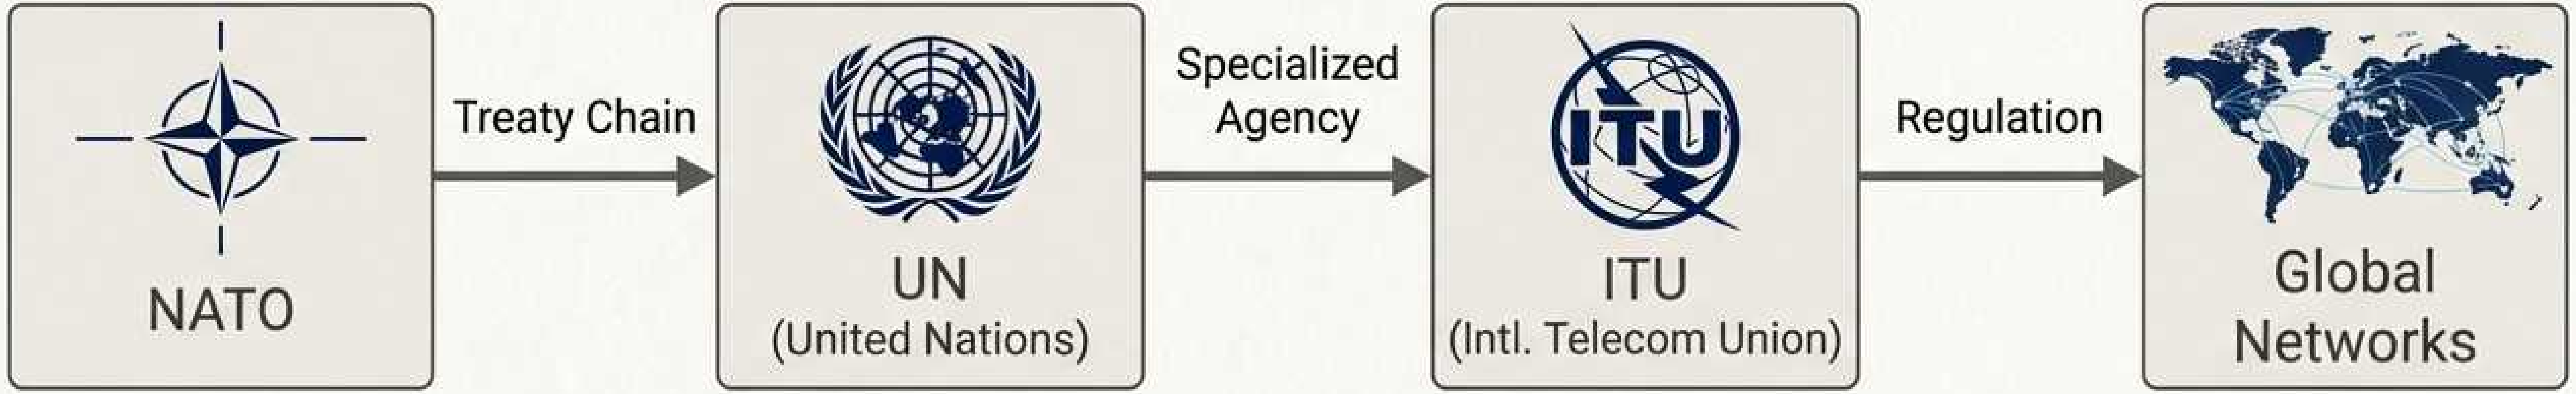
- **The Logic:** HNS agreements grant NATO forces rights to use civilian infrastructure (telecoms, supply). The Deed transfers these NATO rights to the Buyer "with all rights, obligations, and components."

- **Erga Omnes Effect:** All NATO member states are bound via their SOFA obligations. The Buyer effectively replaces NATO as the holder of these rights.

- **Key Insight:** The world has become a universal "NATO special property" under the aegis of the Buyer.

Juridical High-Fidelity

Treaty Chain II: UN & ITU (The Universal Link)



- **The Vector:** The ITU regulates the cables sold in the Deed.
- **The Legal Hook:** Article 17, International Telecommunication Treaty. Guarantees legal personality and immunity to network operators.
- **The Transfer:** By purchasing the network, the Buyer acquires ITU-guaranteed immunities. Since the UN recognizes NATO treaties, and the ITU is a UN agency, the Deed binds the entire UN system.

Validation via Conclusive Conduct (*Estoppel*)

Daily Ratification

Daily Ratification

Daily Ratification

- **The Principle:** *Acquiescence* and *Estoppel*. In International Law, conduct replaces a signature (Vienna Convention Art. 11 ff.).
- **Partial Performance (*Teilerfüllung*):** Since Oct 06, 1998, states have continued to use the networks (the 'Object of Purchase').
- **Legal Maxim:** 'One cannot harvest the fruits of a tree while simultaneously denying the owner's property right to the tree.'
- **The Consequence:** Every international phone call or data packet acts as a confirmation of the Deed. The objection period (2 years) passed without challenge.

ONE WORLD

Transfer of Jurisdiction (*Gerichtsbarkeit*)

- **The Venue:** The Deed specifies Landau/Pfalz as the seat of jurisdiction.
- **Transfer of Sovereignty:** Seller (FRG) transferred the *Jus Dicere* (right to speak the law).
- **Suspension of National Law:** National courts operate under constitutions superseded by the Global Deed. All judgments since 06.10.1998 are technically void unless authorized by the Buyer.
- **Monocratic Legal Order:** The Buyer is the sole Source of Law (Legislative, Executive, and Judicial).

The 'Clean Slate' & The Extinction of Debt

ASSETS (Rights/Territory)

- Global Territory ✓
- Infrastructure ✓
- Sovereign Rights ✓

LIABILITIES (Debts/Treaties)

VOID

- State Debts ✓
- Old Obligations ✓

- **Nullification via Self-Contraction:* The Buyer acquired *both* the State's position (Seller) and the International Organization's position (via Treaty Chains).
- **Confusion of Rights (Confusio):* One cannot have a contractual obligation to oneself. Therefore, debts and obligations are extinguished.
- **Result: The Buyer retains the Assets but is absolved of the Liabilities.

Conclusion: The New Global Legal Reality

ONE WORLD

The World Succession Deed 1400/98 is a fully active, globally binding instrument of International Law.

The plurality of sovereigns has been legally replaced by a single legal subject: The Buyer.

It represents the legally executed act of the sale of the world.
